

COLE MEMORIAL'S REHABILITATION TEAM OFFERS...

F: Functional

C: Capacity

E: Evaluation

- ◇ An FCE is an evaluation tool designed to determine an individual's ability to safely perform the physical demands of work.
- ◇ An ErgoScience FCE provides a detailed report to help providers and employers make return to work decisions. The results of the FCE are objective, valid and reliable. The FCE scoring system determines an accurate level of work and can project the patient's abilities for an 8-hour work day. This information is critical to the worker's ongoing wellness and workplace safety.
- ◇ Cole Memorial's Rehab Services team has five therapists certified to perform ErgoScience FCE's.
